

How to advocate for community responses and systems strengthening interventions in Global Fund funding requests

The purpose of this information note is to support civil society and community groups to design and include community systems strengthening interventions and community-based monitoring activities in funding requests during the 2017-2019 Global Fund funding cycle. This information will be of interest to community groups, key population networks, country coordination mechanism (CCM) members, ministries of health, disease program managers, and health service providers. The document highlights the wide range of community-led interventions and systems strengthening opportunities that may be included in funding requests to increase impact against the three diseases.

This information note was co-developed by ICASO and the [Global Forum on MSM & HIV](#).
